

Start rolling paper on this edge - print side out

How to make your magic wand

1. Print this wand template
2. Start rolling the paper on the long edge with printed side out making a tube about ½"
3. After rolling paper into a tube, tape edge with 2 or 3 pieces of clear tape

The Floating Magic Wand

The magic wand magically floats behind your opened hand, and then drops on your command!

To create the illusion of the wand floating behind your hand, you keep it in place with your index finger that is hidden by your other hand. Look at the illustration to the left. To make it drop, just lift your finger!
